

Project (Phase 4)

Group Name: Services

Student Name: Albion Osmanaj

Testing

Because my website has been build using already existing software in the case of WIX, I cannot access the code of the website to conduct a more detailed testing. But we can still test how the features that have been implemented using WIX work by simply accessing the website using this link :

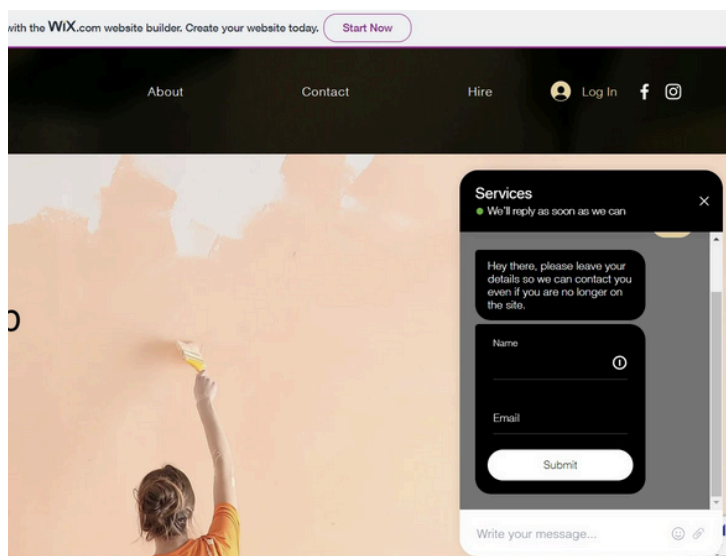

<https://osmanajalbioni.wixsite.com/services>

Find the Perfect Provider for Your Job

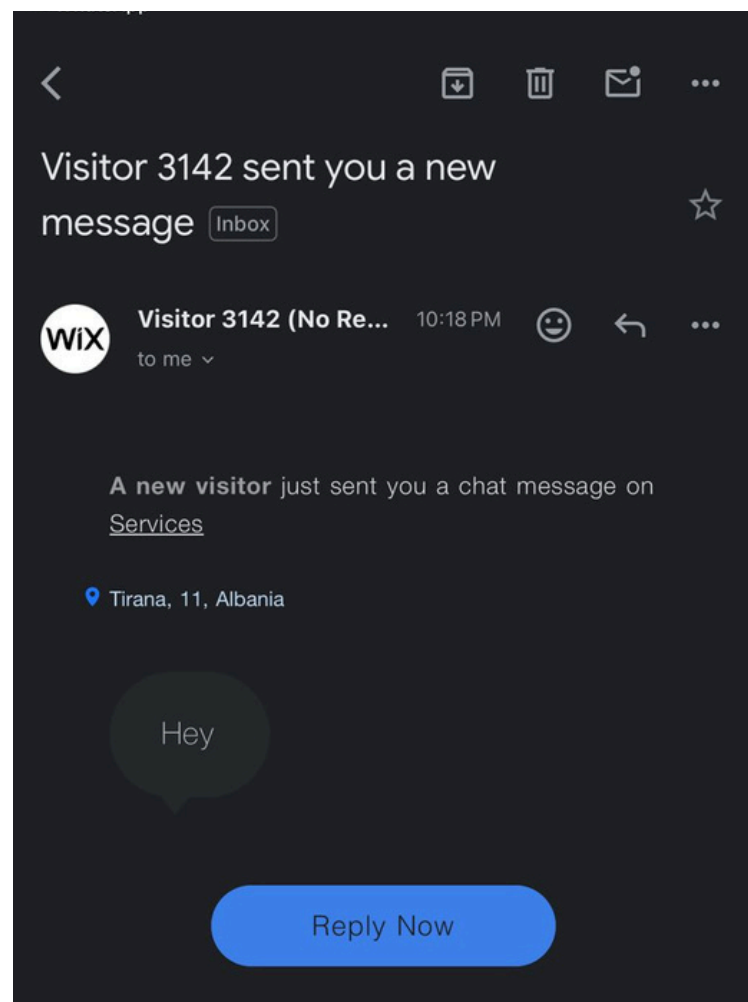

Hire the Best for Your Needs

Let's Chat!

Here we can see the home page of the website. We can check some of the main features like the chat box in the bottom that allows us to communicate with our end users.

As we can see, the chat box will prompt the user to identify itself and also send the site supervisors a direct email

Service Details

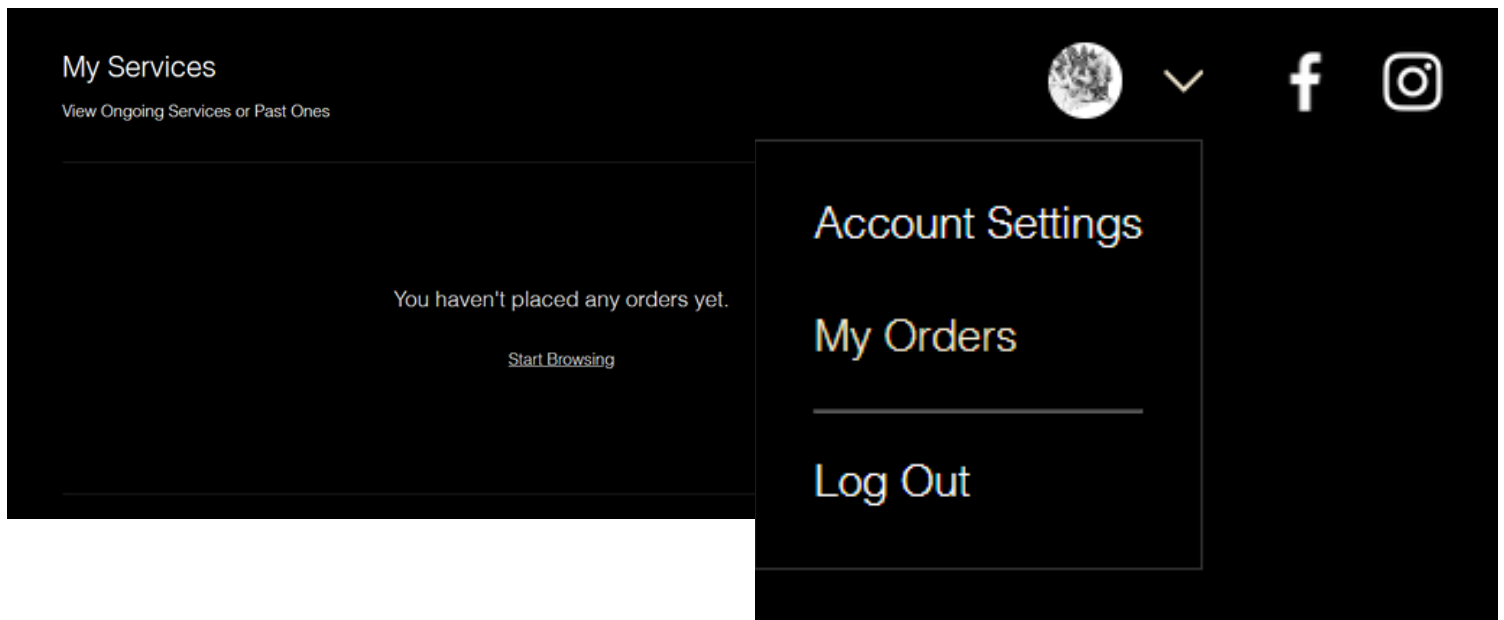

Plumber

[Next](#)

After we select the plumber we can also select a date of booking their services but further actions cannot be made because a payment feature has not been activated because of WIX restrictions. Since this is just an experimental site there was no need to add a payment feature to it.

Another feature we can test is the sign up feature. In this case you can either use Google or Facebook or just create your own account.

After you sign up you can book services, check your ongoing orders or update your account settings.

These are just some of the basic tests that I have conducted to ensure that the site is up and running and working as intended.
